JOURNAL OF RESEARCH IN SCIENCE TEACHING

Volume 4 1966

Editor: J. Stanley Marshall

Department of Science Education
The Florida State University, Tallahassee, Florida

Editorial Advisory Board

J. DARRELL BARNARD
New York University
New York, New York

WILLIAM COOLEY
University of Pittsburgh
Pittsburgh, Pennsylvania

PAUL deH. HURD
Stanford University
Palo Alto, California

JOSEPH F. JORDAN
John Wiley & Sons, Inc.
New York, New York

EUGENE C. LEE
Emory University
Atlanta, Georgia

JOHN MASON
Michigan State University
East Lansing, Michigan

SIDNEY ROSEN
University of Illinois
Urbana, Illinois

IRWIN L. SLESNICK
Western Washington State College
Bellingham, Washington

HERBERT A. SMITH
Colorado State University
Fort Collins, Colorado

FRANK X. SUTMAN
Temple University
Philadelphia, Pennsylvania

STEPHEN S. WINTER
University of Buffalo
Buffalo, New York

ROBERT E. YAGER
University of Iowa
Iowa City, Iowa

Published under the auspices of

NATIONAL ASSOCIATION FOR RESEARCH IN SCIENCE TEACHING and ASSOCIATION FOR THE EDUCATION OF TEACHERS IN SCIENCE

by John Wiley & Sons, New York • London • Sydney

JOURNAL OF RESEARCH IN SCIENCE TEACHING

Volume 4, 1966

ISSUE 1, MARCH

From the Editor 1
The Use of Inservice Programs to Diagnose Sources of Resistance to Innovation: Mary Budd Rowe and Paul DeHart Hurd 3
Three Emphases in Teaching Biology—A Statistical Comparison of Results: Robert E. Yager and John W. Wick 16
Inquiry Training and Problem Solving in Elementary School Children: David P. Butts and Howard L. Jones 21
The Relationship of Three Factors in Printed Materials to Student Achievement: Edward J. Eaton 28
Research Reports
Trends in Assessing Teacher Effectiveness: Gladys S. Kleinman 37
The Influence of Teacher Attitudes and Individual Differences on Pupil Achievement with Programed Science Materials: Alton L. Taylor 38
Using Programed Instruction to Teach High School Chemistry: J. Henry Sayles 40
The Development of Concepts of Space, Matter, and Energy in Students at the College Level: Leona K. Adler 41
Earth Science Gains Momentum in the Secondary Schools: Robert E. Boyer and John L. Snyder 43
The Concept of "Model" and Educational Research: Henry Robert Weinstock 45
Analyzing Test Responses with Symbolic Logic: Gary R. Smith .. 52
Preparing the Junior High School Science Teacher, Model 1980: Matthew H. Bruce, Jr. 59
Books Received 63

ISSUE 2, JUNE

From the Editor 65
A Study of Small Group Dynamics and Productivity in the BSCS Laboratory Block Program: Paul DeHart Hurd and Mary Budd Rowe 67
Background Factors and Success in College Physics: John R. Bolte 74
Factors Related to Achievement in Junior High School Science in Disadvantaged Areas of New York City: Morsley G. Giddings 79

Cooperative Development of Locally Oriented Achievement Tests in Chemistry: J. A. Schmitt, J. J. Montean, S. S. Winter, and S. D. Farr 85
Hiding behind Course Titles: Frank X. Sutman 92
Research Reports
A Comparison of Factual Teaching and Conceptual Teaching in Introductory College Astronomy: Marvin B. Strope and A. L. Braswell 95
An Analysis of Selected Aspects of the Science Preparation of Prospective Elementary Teachers at the University of Miami: Henry N. Hardin 96
The Determination of Criteria for the Selection of Students for the PSSC Physics Course: Arthur I. Rothman 98
A Method of Producing Up-to-Date Science Material for Elementary Children: R. C. Bradley and N. Wesley Earp 102
The Introduction of Concepts in Kinetic Molecular Theory to Children: David M. Dennis 106
Science Achievement as It Relates to Science Curricula and Programs at the Sixth Grade Level in Montana Public Schools: Malcolm D. Swan 112
Book Review 124

ISSUE 3, SEPTEMBER

From the Editor 125
Science as Mind-Affected and Mind-Effecting Inquiry: J. Doyle Casteel and Robert E. Yager 127
Problems and Resolution in Design and Execution of Curriculum Research: John Schmitt, John Montean, David Robinson, and Paul Joslin 137
The Strategy of Inquiry and Styles of Categorization: Norval C. Scott, Jr. 143
An Examination of the Development of Science Concentrations for the Prospective Elementary School Teachers at the University of Texas: Edward J. Eaton 154
Evaluation and the New Curricula: J. Dudley Herron 159
Do Teachers Really Want Science Equipment?: John F. Newport 171
Student Opinion Changes During a Year of Studying the Harvard Project Physics Course: Merritt E. Kimball 173
Can We Teach?: Donald J. Schmidt 175
A Study to Determine the Distribution of Male and Female Figures in Elementary Science Textbooks: Mary Ann Kinneer Gaetano 178
Conceptualizations of Change Held by Ten and Eleven Year Old Children: Harold T. Neuberger 180
Teaching Science for Creativity—Needed Research: Nathan S. Washton 182
The Effectiveness of Inductive Laboratory, Inductive Demonstration, and Deductive Laboratory in Biology: John C. Coulter 185

Single Concept Films: A Pilot Study Based on CHEM Study Films: Julian R. Brandou 187
The Strength and Order of Responses in a Sequence As Related to the Degree of Structure In Stimuli: O. Roger Anderson 192
Referents to Scientific Literacy: Milton O. Pella, George T. O'Hearn, and Calvin W. Gale 199
Books Received 209
Book Reviews 210

ISSUE 4, DECEMBER

From the Editor 213
An Investigation of an Experiment Model in the Physical Sciences for the Junior High Student: David D. Redfield and Ronald K. Atwood 217
Training Leaders in Mathematics Education. A Contrast with Science Education: Joseph M. Scandura 227
Can Science Education be Scientific? Notes Toward a Viable Theory of Science Teaching: Clinton St. John 230
Teacher Effects Upon the Outcomes of Science Instruction: Robert E. Yager 236
Research Reports
College General Education Science: Examination of a Program: Thomas P. Fraser 243
An Experiment on the Retention of Matter Presented in a Sound Film: F. E. Clegg 244
The Effect of Nonrandomization of Correct Answer Option in Standardized Chemistry Examinations: Ned D. Heindel and Arthur R. Lepley 246
An Experimental Study of Multiple-Choice and Open-Ended Tests in Physics: Haym Kruglak 247
A Visual Analog of Digital Computer Counting: Henry Winthrop 249
A Structure for Science Education: Milton O. Pella 250
Precision in Research on Mathematics Learning: The Emerging Field of Psycho-mathematics: Joseph M. Scandura 253
Mental Age and Science Concepts. A Pilot Study: William Harris and Verlin Lee 275
A Refined Definition of Structure in Teaching: O. Roger Anderson. 289
Book Review 292
Books Received 293
Author Index 295
